Table 1: cap

1 Introduction

You can and should cross-reference sections and sub-sections. We use R Core Team (2023).

The remainder of this paper is structured as follows.

2 Data

2.1 Source

The data used in this paper was collected by the OpenDataToronto Library (Gelfand 2020). The specific data set used in this research is the 'Cycling Network' (Data 2024).

Data used in this paper was downloaded, cleaned and analyzed with the programming language R (R Core Team 2023). Also with support of additional packages in R: `sf` [], `readr` (Wickham, Hester, and Bryan 2023), `ggplot2` (Wickham 2016), `osmdata` [], `tidyverse` (Wickham et al. 2019), `jsonlite` [], `dplyr` (Wickham et al. 2023), .

2.2 Measurement

2.3 Method

3 Results

3.1 Data Trend

3.2 Distributions

3.3 Maps

Our results are summarized in **?@tbl-modelresults**.

4 Discussion

4.1 First discussion point

If my paper were 10 pages, then should be be at least 2.5 pages. The discussion is a chance to show off what you know and what you learnt from all this.

4.2 Second discussion point

4.3 Third discussion point

4.4 Weaknesses and next steps

Weaknesses and next steps should also be included.

A Appendix
